Notice to Applicants for Lot Severances

Sewage System Review

As part of the requirements for severance in the Town of Essex, the Building Department is asked to review the Application and comment on any discrepancies with Town By-Laws, the Ontario Building Code, or other applicable laws.

During their review, a visit to the site may be necessary. The Building Inspector may require an inspection of the entire sewage system (septic system) to verify conformity with Part 8 of the Building Code. If the sewage system is found to be deficient, there may be a condition placed on the severance approval requiring that the sewage system be upgraded or replaced. If the system is not upgraded by the severance expiration date, the severance approval would lapse but the sewage system may still be required to be brought up to Code.

If you are concerned about the condition of your septic system, you may wish to consult a licensed private sewage system installer prior to submitting your application for consent.

Your responsibility as an Applicant/Owner:

- Consider severance application carefully
- If a septic system review is required, please contact the Building Department for additional information
- Provide unhampered access to property for Town Staff
- Provide information on the location of sewage system components
- If not sure of locations, you can consult a private sewage system installer to locate and verify all sewage system information

What the Building Inspector expects as a result of sewage system inspection:

- Verification that all components of the sewage system are in place
- Confirmation that the septic tank (primary treatment of sewage) is functioning properly
- Confirmation that the weeping bed (secondary treatment of effluent) is functioning properly
- Verification that existing system is functioning properly (no effluent outcropping)
- Determine if there are any illegal connections to ditches, field tiles, overflows or "hot taps"
- "Severed" and "retained lots" are to be inspected equally.
