COLCHESTER SOUTH SEWAGE WORKS EXPANSION

The southern portion, or Urban Area, of Colchester South Community of the Town of Essex is serviced with a communal sewage system. Wastewater within this service area is collected by sanitary sewer systems and then conveyed to the existing Colchester South wastewater treatment facility for treatment. The Town has been realizing increasing wastewater servicing demands from significant development pressures within the community area. To ascertain this impact, the Town has initiated a Class Environmental Assessment (Class EA) to upgrade the existing Colchester South Sewage Works and expand the original service area.

This study will include an opportunity and problem statement, evaluation of alternative solutions, evaluation of alternative design concepts, and recommendations for the preferred design. This assessment will include consideration for potential environmental, social, and economic impacts as well as measures to mitigate adverse impacts.

THANK YOU

Public participation will form an integral part of this Class EA study to ensure that the concerns of the public and affected groups within the study area are identified, documented, and assessed. Thank you for your interest in this project and attendance at this public information centre.

Copies of the Public Information Centre No.2 material are available on the Town's project website below:
